Shant Tchatalbachian Product Manager/Developer

EXPERIENCE

Securitas Security Services Inc., San Francisco, CA — *Security Supervisor (Extraordinaire)*

Security Supervisor for Securitas at Waymo/Google. 2021 - PRESENT

Responsibilities include site operations, and leading the accounts HR/productivity tracking, as well as designing and implementing various apps, APIs, and creating efficient data management/access controls. Helped track the Securitas Technology deployment, developed client-facing presentations, and user experiences, informing on the budget, officer, and CCTV operations.

[OMNITECK](#), San Francisco, CA — *Full Stack Developer* 2013 - PRESENT

I offer IT, system administration, graphic design, and information security as well as custom web development on dedicated cloud servers (Google Cloud, AWS, Kubernetes). I can also evaluate network and application security with relevant penetration testing methods and effectively secure any OS or server using FIDO2 technologies.

Glendale Holy Trinity Church, Glendale, CA — *TV Producer & Media Coordinator* 2013 - MARCH 2016

I managed the production of filming, sound, editing, and uploading for broadcast on local TV and YouTube, and was in charge of managing social media and the church's website.

Olitics Inc., Los Angeles — *CTO & Co-Founder* APRIL 2015 - MARCH 2016

Olitics was a non-partisan political website providing a range of services from daily news updates, information on elected officials, duties of government branches, state information, voter registration, scholarships and internships, political party information, and political terminology. Our goal was to provide a political platform to educate and inform young Americans politically and to increase awareness and engagement.

EDUCATION

Burbank High School, Burbank, CA — *High School Diploma* 2010 - 2014

Activities and Societies: GSA, Photography

Pasadena City College, Pasadena, CA — *Some Credits* 2015 - 2016

Studied Computer Information Systems and General Education
